Submission Letter from FIGHTING UNEMPLOYMENT FU For fair and free elections.

Dear Sir/Madam

Our thoughts about the upcoming election in October 2021 are (i). if the election are free, why are other political parties not on the news every day? So that all parties that are going to contest also be know? I'm asking this question because FU parties was registered in March 2021 and no one has ever seen it on the news, how is this going to be fair because we're also registered under National Level? Parties like ActionSA are always on the news and they have never contested before? So please tell us how is this fair, just because we're not famous or not being charged with criminal offence doesn't mean we have to be neglected.

(ii). If you say free elections does this mean all parties are going to be founded with funds to make poster and advertise for free?? Are they going to be founded to hold rallies to prepare them self's for the elections, where are they going to get money to buy covid-19 PPS's, and also make sure everyone follow covid-19 regulation? If we can be founded for this, only then the election can be fair and free for every party. Lastly since there are no business that sponsors political parties because government stopped them, let the government sponsor all political parties.

Here is the statement from us as FU Political Party here in Free State, the first ever Political Party to be registered under National Level in Free State Province.

Yours Sincerely

Tsietsi Mokone
